Xiaoxuan Zhou

151-5201-2670 ⋄ echoaugust2@gmail.com

EDUCATION

Software College, Northeastern University (China) *September 2022 – June 2026*
B.E. in Software Engineering

School of Computer Science, Peking University *September 2026 – Expected*
Ph.D. Student (Five-year Direct Ph.D. Program)

ACADEMIC PERFORMANCE

Academic Year	Ranking
2022-2026	1st in GPA (1/297)
2022-2025	1st in Comprehensive Quality (1/496)

ENGLISH PROFICIENCY

IELTS	**7.0**	*September 2022*
CET-6	**587**	*December 2024*

RESEARCH

TestTailor: Generating High-Coverage Tests via Path-Proximal Tests with LLMs
Xiaoxuan Zhou*, Yiling Lou, Jinhao Dong, Dan Hao* *FSE 2026*

- **Description**: TestTailor transforms vague coverage goals into precise path-level guidance for LLM-based test generation by combining path-proximal test analysis with symbolic constraints from uncovered paths, explicitly telling the model how to reach hard-to-cover branches. On the CODAMOSA benchmark, it significantly outperforms prior methods, achieving up to 12.78% higher coverage while reducing API cost by about 60%.

TestDecision: Sequential Test Suite Generation via Greedy Optimization and Reinforcement Learning
Guoqing Wang, Chengran Yang, ***Xiaoxuan Zhou****, Zeyu Sun, Bo Wang, David Lo, Dan Hao* *ISSTA 2026*

- **Description**: TestDecision introduces a step-wise greedy inference framework theoretically justified under monotone submodularity, paired with a reinforcement learning training pipeline to maximize marginal coverage gain. It achieves 38.15–52.37% improvement in branch coverage and 298.22–558.88% improvement in execution pass rate over base models, finding 58.43–95.45% more bugs than vanilla LLMs.

HONORS AND AWARDS

Top 10 Outstanding Undergraduate Students of Northeastern University *April 2026*
Outstanding Graduate of Liaoning Province *December 2025*
National Scholarship (Twice) *December 2023, November 2024*
Outstanding College Students of Shenyang City (Only One) *December 2023*
